

INTO THE DRINK

Produced by  LiquidAssets.tv

Into the Drink is a travel show like no other -- in each episode, we go "into the drink" on an intoxicating celebration of exotic destinations near and far, experiencing its local breweries, distilleries and vineyards, and diving into its eclectic nightlife. We immerse ourselves in the local culture, seek out unique local spirits, adrenaline-pumping marine life, and nonstop nightlife, from the tide's ebb to the middle of the deep blue sea.

Who says drinking and diving don't mix? It is all about the order of life that allows you to live it. If Anthony Bourdain has no reservations, then we have no limitations.

Our show will appeal to a broad audience, including a young, active, outdoorsy, fun-loving demographic. With several additional destinations scheduled and published, we already have a large portion of the estimated 5 million U.S. divers waiting to watch and be a part of our adventures.
