

# FishingWorld

Fishing World brings to television the beautiful world of travel and fishing. The series was filmed in many different locations: Oman, Nicaragua, Costa Rica, Florida, Alaska, Texas, Idaho, California, Wisconsin, Romania, Greece, Italy, Mexico, Barbados, Guyana, Australia, Thailand, Malaysia and Cuba. We not only experienced the beauty of countries, but also fished for a variety of fish species. Unlike many other fishing shows, Fishing World was filmed in true documentary style, which means no additional filming, no written stories about monsters, but true stories about what really happened during eight years of filming. The music that is performed in the series is an important part of the show in order to emphasize the dynamics of the show's segments. Fishing World was filmed in full HD.

## Episode 006 - TARPON MADNESS

We are now again in Key West Florida. If we say that this episode is titled Dance of The Silver King would you believe that you will see more Tarpon jumps than ever before in our show? We assure you that you will be very entertained by the 'dance'. Tarpon Madness, title of this episode tells itself how successful day we had in Key West fishing for tarpons.

## Episode 019 - SHARKS IN KEY WEST PART 1

Fishing for barracudas! It is interesting indeed that one of the main bait for catching sharks is BARRACUDA! Amazing indeed but for to us unknown reason sharks between other pray always take barracuda. Well, first we will fish for this specie and afterwards we will try to catch the scariest beast: the shark! Part one.

## Episode 023 - HELLS CANYON,

or Sturgeon fishing in Idaho. We filmed this show on the Snake River in north part of Idaho. We were driving jet boats in Hells Canyon and fishing for Sturgeon. Quite amazing fishing in Idaho. Hells Canyon is not very pretty name for a canyon and Snake River not so exotic name for river. We will fish for big sturgeons on Snake River and in the Hells Canyon and we promise a lot of excitement.

## Episode 062 FISHING IN CUBA – OCEAN KINGS

Fishing in shallow waters around mangrove islands is always exciting. We fished with fishing lures so our targeted fishes were predators. They strike hard, they grabbed and mostly destroyed our lures and was really great fun catching them. However, all of a sudden everything turns to calm and peaceful in the water. Why? Because the king comes, the king? Yes, sharks are real kings of the sea. We even managed to catch a couple of them, well, frankly, to hold them for some time.....
